1. **Cancer Intervention and Surveillance Modeling Network (CISNET) (U01)**

The National Institute of Health and The National Cancer Institute (NCI) solicits applications for the Cancer Intervention and Surveillance Modeling Network (CISNET). The goal of CISNET is to use simulation and other modeling techniques (a) to understand the impact of cancer control interventions (i.e., screening, treatment, prevention) on national trends in cancer rates, and (b) to inform national/regional/local decisions on the most efficient utilization of existing and emerging technologies and strategies for the control of cancer. The NCI expects to commit $5.4 million in year 1 and $6.0 million per year in years 2-5 to fund approximately four to six awards. An applicant may request a project period of up to 5 years and budget for up to $1.3M total costs for the first year.

**Deadlines:**
- Letters of Intent: October 3, 2009
- Proposal Submission: November 3, 2009

2. **Sociology**

This National Science Foundation Program supports basic research on all forms of human social organization—societies, institutions, groups and demography—and processes of individual and institutional change. The program encourages theoretically focused empirical investigations aimed at improving the explanation of fundamental social processes. Included is research on organizations and organizational behavior, population dynamics, social movements, social groups, labor force participation, stratification and mobility, family, social networks, socialization, gender roles, and the sociology of science and technology.

**Deadlines:**
- Proposal Submission: August 15, 2009

3. **Decision, Risk and Management Sciences**

The National Science Foundation Decision, Risk and Management Science program supports scientific research directed at increasing the understanding and effectiveness of decision making by individuals, groups, organizations, and society. Disciplinary and interdisciplinary research, doctoral dissertation research, and workshops are funded in the areas of judgment and decision making; decision analysis and decision aids; risk analysis, perception, and communication; societal and public policy decision making; management science and organizational design.

**Deadlines:**
- Proposal Submission: August 15, 2009
4. **2009 HIV Prevention for Women Living in the U.S. Virgin Islands**

The Purpose of this program is to provide accurate and comprehensive information on HIV/AIDS prevention AND healthy behaviors to maintain both mental and physical health for women living in the U.S. Virgin Islands. The program shall increase HIV prevention knowledge and reduce the risk of contracting HIV among women using gender specific multi-level interventions and approaches.

**Deadlines:**
Proposal Submission: July 17, 2009

5. **Design and usage of massively Multiplayer Online Games and Persistent Immersive Synthetic Environments**

The National Aeronautics and Space Administration (NASA) Goddard Space Flight Center’s Learning Technologies Project Office (LTPO) is releasing a Cooperative Agreement Notice (CAN) to conduct research and evaluation on the design and usage of Massively Multiplayer Online Games (MMOG) and Persistent Immersive Synthetic Environments (Virtual Worlds) for NASA Science, Technology, Engineering and Mathematics (STEM) Education and Training.

**Deadlines:**
Proposal Submission: August 10, 2009
