Purpose: The Data Management Committee provides guidance and recommendations for the University’s data related to strategic and operational planning, business performance management, and assuring data integrity and security. The committee’s work plays a critical role in developing a systematic approach to the governance of data in support of the University’s decision-support and processes. The committee is tasked with maintaining clear data policies, models, and definitions to ensure effective and efficient business processes.

I. Opening Remarks

II. AY 2022-2023 Committee’s Goals
   a. Identify operational changes made within Banner to include but not limited, to, new codes, forms and integrated third-party platforms
   b. Banner Security Roles – assist OITC with completing task
