

Student Learning Outcomes Exercise

Academic Program/Degree Level: _____

Faculty: _____

1. Develop a **knowledge-based Student Learning Outcome**:

- a. Describe what you want your students to know by the time they complete your program.
 - i. What are the most important terms, concepts, theories, and principles they should know?
 - ii. What methods and procedures should they know?
- b. Describe how they will demonstrate this knowledge
 - i. What will the student be asked to perform/provide/document/etc.?

I. **Outcome 1:** Knowledge (What should the student know?):

II. Identify the **means of assessment** (How will you measure what the student has learned?) and provide the **criteria for success** (What is the level of proficiency expected?):

MOA 1: Assessment Tool: _____

Assessment Method:

Criteria for Success:

MOA 2: Assessment Tool: _____

Assessment Method:

Criteria for Success:

MOA 3: Assessment Tool: _____

Assessment Method:

Criteria for Success:

III. How will the results allow you to make improvements in the student learning experience?

Use of Results:

2. Develop **Skill** related **Student Learning Outcome**:

- a. Describe what you want your students to be able to do with what they know?
 - i. What skills or competencies do they need to solve problems in the discipline?
- b. Describe how they will demonstrate this skill
 - i. What will the student be asked to do?

I. **Outcome 2:** Skill (What should the student be able to do/demonstrate?): _____

II. Identify the **means of assessment** (How will you measure what the student has learned?) and provide the **criteria for success** (What is the level of proficiency expected?):

MOA 1: Assessment Tool: _____

Assessment Method:

Criteria for Success:

MOA 2: Assessment Tool: _____

Assessment Method:

Criteria for Success:

MOA 3: Assessment Tool: _____

Assessment Method:

Criteria for Success:

III. How will the results allow you to make improvements in the student learning experience?

Use of Results:

3. Develop **Value** related **Student Learning Outcome**:

- a. Describe what you want your students to value by the time they complete your program.
 - i. What dispositions should a student should embody?
 - ii. What do you want your students to care about?
 - iii. What are some of the social, ethical, and moral characteristics or behaviors you expect your student to exhibit?
 - iv. What ethical issues should they be able to address?
- b. Describe how they will demonstrate this value system
 - i. What will the student be asked to do that proves that this value system is inherent?

I. **Outcome 3:** Value/Think (What values or attitudes should they develop?): _____

II. Identify the **means of assessment** (How will you measure what the student has learned?) and provide the **criteria for success** (What is the level of proficiency expected?):

MOA 1: Assessment Tool: _____

Assessment Method:

Criteria for Success:

MOA 2: Assessment Tool: _____

Assessment Method:

Criteria for Success:

MOA 3: Assessment Tool: _____

Assessment Method:

Criteria for Success:

III. How will the results allow you to make improvements in the student learning experience?

Use of Results:
